BOARD OF DIRECTORS' RESPONSIBILITY FOR FINANCIAL REPORTING	3
INDEPENDENT AUDITOR'S REPORT	4
STATEMENT OF FINANCIAL POSITION	9
NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS	19

BOARD OF DIRECTORS' RESPONSIBILITY FOR FINANCIAL REPORTING

The consolidated financial statements of Global Power Synergy Public Company Limited and its subsidiaries have been prepared in conformity with the requirements of the Securities Exchange Commission under the Securities and Exchange Act B.E. 2535, the Announcement of the Department of Business Development, issued in accordance with Section 11, Paragraph 3 of the Accounting Act B.E. 2543, and the Financial Reporting Standards prescribed by the Federation of Accounting Professions.

The Board of Directors is responsible for financial statements and the disclosures to ensure that the financial statements are presented fairly, in all material aspects. The effectiveness of internal control has been established to provide reasonable assurance of the financial statements, together with sufficiency and accuracy of accounting data, to preserve the Company's asset and prevent fraud and irregularities with material implications. The Company's ability to continue as a going concern has been assessed in preparing the financial report. The financial report has been prepared in accordingly to appropriate accounting policy and consistency practices, and in conformity with Thai Financial Reporting Standards. Significant information has sufficiently disclosed in notes to financial statements, where the auditor expressed an opinion on the financial statements of Global Power Synergy Public Company Limited and its subsidiaries in the auditor's report.

Mr. Pailin Chuchottaworn
Chairman

Mr. Chawalit Tippawanich
President and
Chief Executive Officer

4 Independent Auditor's Report

To the Shareholders of Global Power Synergy Public Company Limited

My opinion

In my opinion, the consolidated financial statements of Global Power Synergy Public Company Limited (the Company) and its subsidiaries (the Group) and the separate financial statements of the Company present fairly, in all material respects, the consolidated and separate financial position of the Group and of the Company as at 31 December 2019, and its consolidated and separate financial performance and its consolidated and separate cash flows for the year then ended in accordance with Thai Financial Reporting Standards (TFRSs).

What I have audited

The consolidated financial statements and the separate financial statements comprise:

- the consolidated and separate statements of financial position as at 31 December 2019;
- the consolidated and separate statements of income for the year then ended;
- the consolidated and separate statements of comprehensive income for the year then ended;
- the consolidated and separate statements of changes in equity for the year then ended;
- the consolidated and separate statements of cash flows for the year then end; and
- the notes to the consolidated and separate financial statements, which include a summary of significant accounting policies.

Basis for opinion

I conducted my audit in accordance with Thai Standards on Auditing (TSAs). My responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the consolidated and separate financial statements section of my report. I am independent of the Group and the Company in accordance with the Federation of Accounting Professions under the Royal Patronage of his Majesty the King's Code of Ethics for Professional Accountants together with the ethical requirements that are relevant to my audit of the consolidated and separate financial statements, and I have fulfilled my other ethical responsibilities in accordance with these requirements. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Key audit matters

Key audit matters are those matters that, in my professional judgment, were of most significance in my audit of the consolidated and separate financial statements of the current period. These matters were addressed in the context of my audit of the consolidated and separate financial statements as a whole, and in forming my opinion thereon, and I do not provide a separate opinion on these matters.

Key audit matter	How my audit addressed the key audit matter
<p>Business combination</p> <p>As disclosed in Note 14.1 - Investments in subsidiaries, the Group paid cash consideration of Baht 93,001 million to acquire a 69.11% shareholding of Glow Energy Public Company Limited (Glow) which engages in generating and supplying electricity, steam and water for industrial use. Management identified the acquisition of this shareholding qualified as a business combination according to the definition in TFRS 3 "Business combination".</p> <p>The management engaged the external valuer to appraise the fair value of net identifiable assets acquired. The fair value of net identifiable assets acquired was Baht 89,003 million, mainly comprised property, plant and equipment of Baht 75,336 million, intangible assets (right to power purchase agreements) of Baht 44,480 million and liabilities assumed of Baht 66,497 million. The valuation of net assets acquired was performed as part of the purchase price allocation.</p> <p>I focused on the identification of the fair value of intangible assets arising from the business combination because the external valuer applied the discounted cash flows that the model involves significant estimation and judgement made by the management to assess the future cash flows and discounted rate applied for the future cash flows.</p>	<p>I carried out the following procedures in order to obtain evidence of the management's assessment of acquisition of shareholding and determination of fair value of net identifiable assets acquired:</p> <ul style="list-style-type: none"> • Read the share purchase agreement to understand the key terms and conditions and confirmed our understanding of the transaction with the management. • Reviewed management's assessment that the acquisition of investment should be accounted for as the investment in a subsidiary and application of accounting for business combination. • Assessed the appropriateness of the identifiable assets acquired and the liabilities assumed at the acquisition date and also evaluated management's procedures for determining the fair values of the net identifiable assets acquired. • Evaluated the competency, qualifications, experience and objectivity of management's experts. • Tested the calculation of fair values intangible assets and also challenged management's significant assumptions used in the estimation of future cash flows, for example the electricity tariffs, assumed capacity of the power plants, operating expenditures, and capital structure by comparing those assumptions to the underlying agreements and external sources. • Assessed the discount rate, taking into account independently obtained data from available public information of companies in the industry. <p>As a result of the procedures performed, I determined that the acquisition of shareholding of Glow is the business combination in accordance with the definition set out in TFRS 3. The assumptions used in identifying the fair values of intangible assets arising from the business combination were reasonable and in line with the accounting for the business combination.</p>

Key audit matter

How my audit addressed the key audit matter

Impairment assessment of goodwill

Refer to Note 18 Goodwill, as at 31 December 2019, the Group had goodwill of Baht 36,104 million, which represents 14% of the total consolidated assets. Goodwill of Baht 36,089 million arose from the acquisition of shareholding of Glow Energy Public Company Limited (Glow) which engages in generating and supplying electricity, steam and water for industrial use. The Group did not recognise an impairment loss in the 2019 consolidated financial statements.

Management tests the impairment of goodwill annually. The impairment test is performed at level of cash generating unit (CGU) and calculates its recoverable amount by applying the value-in-use model. This model involves significant judgements made by the management in respect to the future operating results of business, projected cash flows and the discount rate to be applied to the projected cash flows. Key assumptions applied in the value-in-use model are electricity tariffs, assumed capacity of the power plants, growth rate, expected changes to operating expenditures, capital structure and discount rate applied to the projected cash flows.

I focused on the valuation of goodwill arising from the acquisition of shareholding of Glow due to its significant value and the fact that the determination of value-in-use depends on a number of assumptions. Those assumptions involve management's significant judgements in assessing the feasibility of future business plans.

I carried out the following procedures to assess the impairment testing of goodwill arising from the acquisition of shareholding of Glow which prepared by the management.

- Satisfied myself as to the appropriateness of management's identification of the CGUs.
- Held discussions with management to understand the basis for the assumptions applied and evaluated whether the goodwill impairment testing process and assumptions had been applied consistently across the Group.
- Challenged management's significant assumptions used in the goodwill impairment testing, especially the electricity tariffs, assumed capacity of the power plants, growth rate, operating expenditures, and discount rate. My procedures included comparing those assumptions to the underlying agreements, external sources, foreign exchange rate forecasts and the approved business plan.
- Assessed reasonableness of the business plan by comparing the 2019 plan with actual results.
- Assessed the discount rate, taking into account independently obtained data from available public information of companies in the industry to see whether the discount rate used by the management was within the acceptable range.
- Tested the sensitivity analysis of key assumptions in the model prepared by the management in order to assess factors to be sensitive to assumptions and the potential impact of range possible outcomes.

As a result of the procedures performed, the key assumptions used by the management are within the reasonable range and none of the items noted above resulted in a change to the impairment testing by the management.

The directors are responsible for the other information. The other information comprises the information included in the annual report, but does not include the consolidated and separate financial statements and my auditor's report thereon.

My opinion on the consolidated and separate financial statements does not cover the other information and I do not express any form of assurance conclusion thereon.

In connection with my audit of the consolidated and separate financial statements, my responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or my knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work I have performed, I conclude that there is a material misstatement of this other information, I am required to report that fact. I have nothing to report in this regard.

Responsibilities of management for the consolidated and separate financial statements

Management is responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with TFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, management is responsible for assessing the Group and the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group and the Company or to cease operations, or has no realistic alternative but to do so.

The audit committee assists the directors in discharging their responsibilities for overseeing the Group and the Company's financial reporting process.

Auditor's responsibilities for the audit of the consolidated and separate financial statements

My objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with TSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with TSAs, I exercise professional judgment and maintain professional scepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group and the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

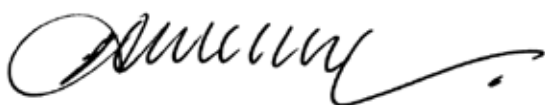

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group and the Company's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the Group and the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. I am responsible for the direction, supervision and performance of the group audit. I remain solely responsible for my audit opinion.

I communicate with audit committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide the audit committee with a statement that I have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence, and where applicable, related safeguards.

From the matters communicated with the audit committee, I determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore the key audit matters. I describe these matters in my auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, I determine that a matter should not be communicated in my report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

1 General information

Global Power Synergy Public Company Limited (the Company) is a public limited company which is the listed company on the Stock Exchange of Thailand. The Company is incorporated in Thailand and the address of its registered office is No.555/2, Energy Complex, Building B, 5th Floor, Vibhavadi Rangsit Road, Chatuchak, Bangkok 10900.

For reporting purposes, the Company and its subsidiaries are referred to as the Group.

The principal business of the Group is the production and distribution of electricity, steam and water for industrial use to the government and industrial customers.

These consolidated and separate financial statements were authorised for issue by the Board of Directors on 12 February 2020.

2 Accounting policies

The principal accounting policies applied in the preparation of these consolidated and separate financial statements are set out below:

2.1 Basis of preparation

The consolidated and separate financial statements have been prepared in accordance with Thai Financial Reporting Standards (TFRS) and the financial reporting requirements issued under the Securities and Exchange Act.

The consolidated and separate financial statements have been prepared under the historical cost convention except as disclosed in the below accounting policies.

The preparation of financial statements in conformity with Thai generally accepted accounting principles requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated and separate financial statements are disclosed in Note 4.

An English version of the consolidated and separate financial statements has been prepared from the statutory financial statements that are in the Thai language. In the event of a conflict or a difference in interpretation between the two languages, the Thai language statutory financial statements shall prevail.

2.2 New and amended financial reporting standards that are relevant and have significant impacts to the Group

2.2.1 New and amended financial reporting standards that are effective for accounting period beginning or after 1 January 2019.

Commencing from 1 January 2019, the Group adopted new and amended Thai Financial Reporting Standards effective for the period beginning on or after 1 January 2019 and relevant to the Group. The adoption of these standards does not have a significant impact to the Group.

2.2.2 New and amended financial reporting standards that are effective for accounting period beginning or after 1 January 2020. The Group has not yet adopted these standards.

a) Financial instruments

The new financial standards relate to financial instruments are:

TAS 32	Financial instruments: Presentation
TFRS 7	Financial Instruments: Disclosures
TFRS 9	Financial Instruments
TFRIC 16	Hedges of a Net Investment in a Foreign Operation
TFRIC 19	Extinguishing Financial Liabilities with Equity Instruments

These new standards address the classification, measurement, derecognition of financial assets and financial liabilities, impairment of financial assets, hedge accounting, and presentation and disclosure of financial instruments.

The Group's management is currently assessing the impact of adoption of these standards.

b) TFRS 16, Leases

Where the Group is a lessee, TFRS 16, Leases will result in almost all leases being recognised on the statement of financial position as the distinction between operating and finance leases is removed. A right-of-use asset and a lease liability will be recognised, with exception on short-term and low-value leases.

The Group's management is currently assessing the impact of adoption of this standard.

2.3 Group accounting - investments in subsidiaries, associates and joint ventures

2.3.1 Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The Group applies the acquisition method to account for business combinations except business combination under common control. The consideration transferred for the acquisition of a subsidiary is the fair value of the assets transferred, the liabilities incurred to the former owners of acquiree and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the Group recognises any non-controlling interest in the acquiree at the non-controlling interest's proportionate share of the acquiree's net assets.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is re-measured to fair value at the acquisition date; any gains or losses arising from such re-measured are recognised in profit or loss.

Any contingent consideration to be transferred by the Group is recognised at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration that is deemed to be an asset or liability is recognised in profit or loss. Contingent consideration that is classified as equity is not re-measured, and its subsequent settlement is accounted for within equity.

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the identifiable net assets acquired is recorded as goodwill. If the total of consideration transferred, non-controlling interest recognised and previously held interest measured is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognised directly in profit or loss.

Intercompany transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed to ensure consistency with the policies adopted by the Group.

A list of the Group's subsidiaries is shown in Note 14.1.

2.3.2 Transactions with non-controlling interests

The Group treats transactions with non-controlling interests as transactions with equity owners of the Group. For purchases from non-controlling interests, the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

2.3.3 Disposal of subsidiaries

When the Group ceases to have control it shall cease to consolidate its subsidiaries. Any retained interest in the entity is re-measured to its fair value, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities.

2.3.4 Business combination under common control

The Group accounts for business combination under common control by measuring acquired assets and liabilities of the acquiree in the proportion of interests under common control at the carrying values of the acquiree presented in the highest level of the consolidation prior to the business combination under common control at the acquisition date. The Group retrospectively adjusted the business combination under common control transactions as if the combination occurred from the beginning of period of which the financial statements in the previous period are comparatively presented in accordance with the guidance of business combination under common control as issued by the Federation of Accounting Professions.

Costs of business combination under common control are the aggregated amount of fair value of assets transferred, liabilities incurred and equity instruments issued by the acquirer at the date of which the exchange in control occurs. Other costs directly attribute to business combination under common control, such as professional fees of legal advisors and other advisors, registration fees, and costs relating to preparation of information for shareholders, are capitalised as an investment in the separate financial statements while immediately recognised as expenses in the consolidated financial statements in the period of which the business combination occurs.

The difference between costs of business combination under common control and the acquirer's interests in the carrying value of the acquiree is presented as "Surplus arising from business combination under common control" in equity and is derecognised when the investment is disposed by transferring to retained earnings.

2.3.5 Associates

Associates are all entities over which the Group has significant influence but not control or joint control. Investments in associates are accounted for using the equity method of accounting.

A list of the Group's principal associates is shown in Note 14.2.

2.3.6 Joint venture

A joint venture is a joint arrangement whereby the Group has rights to the net assets of the arrangement. Interests in joint ventures are accounted for using the equity method.

A list of the Group's principal joint ventures is shown in note 14.3.

2.3.7 Accounting under equity method

Under the equity method, the investment is initially recognised at cost, and the carrying amount is increased or decreased to recognise the investor's share of the profit or loss of the investee after the date of acquisition. The Group's investment in associates and joint ventures includes goodwill identified on acquisition.

If the ownership interest in an associate is reduced but significant influence is retained or the ownership interest in a joint venture is reduced but joint control is retained, only a proportionate share of the amounts previously recognised in other comprehensive income is reclassified to profit or loss where appropriate. Profit or loss from reduce of the ownership interest in an associate or a joint venture is recognise in profit or loss.

The Group's share of its associates' and joint ventures' post-acquisition profits or losses is recognised in the profit or loss, and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the Group's share of losses in associates and joint ventures equals or exceeds its interest in the associate and joint ventures, together with any long-term interests that, in substance, form part of the entity's net investment in the associate, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate and joint ventures.

The Group determines at each reporting date whether there is any objective evidence that the investments in the associates and joint ventures are impaired. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the investments and its carrying value and recognises the amount adjacent to share of profit (loss) of associates and joint ventures in profit or loss.

Unrealised gains on transactions between the Group and its associates and joint ventures are eliminated to the extent of the Group's interest in the associates and joint ventures. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates and joint ventures have been changed where necessary to ensure consistency with the policies adopted by the Group.

2.3.8 Separate financial statements

In the separate financial statements, investments in subsidiaries, associates and joint ventures are accounted for at cost less impairment. Cost is adjusted to reflect changes in consideration arising from contingent consideration amendments. Cost also includes direct attributable costs of investment.

A test for impairment on investments in subsidiaries, associates and joint ventures is carried out when there is a factor indicating that investments might be impaired. If the carrying value of the investment is higher than its recoverable amount, impairment loss is charged to the profit or loss.

2.4 Foreign currency translation

a) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the functional currency). The financial statements are presented in Thai Baht, which is the functional currency and the presentation currency of the Company.

b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit or loss.

When a gain or loss on a non-monetary item is recognised in other comprehensive income, any exchange component of that gain or loss is recognised in other comprehensive income. Conversely, when a gain or loss on a non-monetary item is recognised in profit and loss, any exchange component of that gain or loss is recognised in profit and loss.

c) Group companies

The results and financial position of all of the Group's entities (none of which has the currency of a hyper-inflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- Assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of that statement of financial position;
- Income and expenses for each statement of income and statement of comprehensive income are translated at average exchange rates; and
- All resulting exchange differences are recognised in other comprehensive income.

2.5 Cash and cash equivalents

In the statements of cash flows, cash and cash equivalents includes cash on hand, deposits held at call, short-term highly liquid investments with maturities of three months or less from acquisition date.

2.6 Trade receivables

Trade receivables are carried at the original invoice amount and subsequently measured at the remaining amount less any allowance for doubtful receivables based on a review of all outstanding amounts at the year end. The amount of the allowance is the difference between the carrying amount of the receivable and the amount expected to be collectible. Bad debts are written-off during the year in which they are identified and recognised in profit or loss within administrative expenses.

2.7 Fuel, spare parts and supplies

Fuel, spare parts and supplies are stated at the lower of cost or net realisable value.

Cost of fuel, spare parts and supplies are determined by the moving average basis method. Spare parts and supplies are classified as spare parts and supplies used for specific equipment in power plants and spare parts and supplies used for other general equipment.

The cost of purchase comprises both the purchase price and costs directly attributable to the acquisition of the fuel, spare parts and supplies, such as import duties and transportation charges, less all attributable discounts. The allowance for obsolescence of spare parts and supplies is made on an aging analysis.

2.8 Other long-term investments

Investments in non-marketable equity securities other than investments in subsidiaries, associates and joint ventures are classified as general investments and presented under other long-term investments. The classification is dependent on the purpose for which the investments were acquired. Management determines the appropriate classification of its investments at the time of the purchase and re-evaluates such designation on a regular basis.

General investments are initially recognised at cost, which is equal to the fair value of consideration paid plus transaction cost and are carried at cost less allowance for impairment.

A test for impairment is carried out when there is a factor indicating that an investment might be impaired. If the carrying value of the investment is higher than its recoverable amount, impairment loss is charged to profit or loss.

On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to the profit or loss. In the event that the investments are partially disposed, the book value of disposed investments are identified by weighted average method of book value of the total amount.

2.9 Property, plant and equipment

Property, plant and equipment are initially stated at historical cost. All plant and equipment are subsequently stated at historical cost less accumulated depreciation and allowance for impairment (if any). Initial cost includes expenditure that is directly attributable to the acquisition of the items. These can include the initial estimate of costs of dismantling and removing the item, and restoring the site on which it is located, the obligation for which the Group incurs either when the item is acquired or as a consequence of having used the item during a particular period.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

Depreciation is calculated using the straight - line method to allocate their cost to their residual values over their estimated useful lives, except land which is considered to have an indefinite life, as follows:

	Years
Buildings and leasehold improvements	5 to 40
Power plant, machinery and equipment	3 to 40
Furniture, fixture and office equipment	3 to 28
Vehicles	5

Depreciation of power plant of Houay Ho Power Company Limited's power plant is calculated using the unit of production method.

The asset's residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

The asset's carrying amount is written-down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains or losses on disposals of property, plant and equipment are determined by comparing the proceeds with the carrying amount. The net gains or losses are recognised in profit or loss.

2.10 Intangible assets

Intangible assets with limited life are initially recognised at historical cost and subsequently stated at historical cost less accumulated amortisation and allowance for impairment losses (if any). The amortisation is calculated using the straight-line method over their estimated useful lives as follows:

	Years
Right to use grid system	22 - 24
Right to operate power plant	20
Right to use transmission line	25
Deferred land leasehold right	16 - 30
Right to use pipe rack	8 - 16
Right of way	20 - 31
Right to use gas pipeline	13 - 28
Right to use dedicated berth	14
Computer software	3 - 10
Right to power purchase agreements	5 - 31

2.11 Goodwill

Goodwill represents the excess of the consideration transferred over the fair value of the Group's share of the net identifiable assets, liabilities and contingent liabilities of the acquired subsidiary undertaking or associate or joint venture at the date of acquisition.

Goodwill on acquisitions of subsidiaries is separately reported in the consolidated statement of financial position. Goodwill on acquisition of joint ventures or associates is included in investments in joint ventures or associates and is tested for impairment as part of the overall balance.

Goodwill is tested annually for impairment and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash generating units for the purpose of impairment testing. The allocation is made to those cash generating units or groups of cash generating units that are expected to benefit from the business combination in which the goodwill arose, identified according to operating segment.

2.12 Impairment of assets

Assets that have an indefinite useful life, for example goodwill, are not subject to amortisation and are tested annually for impairment. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the carrying amount of the assets exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest level for which there are separately identifiable cash flows. Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

2.13 Leases

The determination of whether an arrangement is or contains a lease shall be based on the substance of the arrangement, and not merely the legal form. It requires an assessment of whether (a) the fulfilment of the arrangement is dependent on the use of specific assets and (b) the arrangement conveys a right to use such assets.

If the arrangement is a lease or contains a lease, payments and other consideration required by the arrangement shall be separated into those for the lease and those for other elements (e.g. for services and the cost of inputs) on the basis of their relative fair values. The lease element of the arrangement shall be classified as a finance lease or an operating lease.

Leases where the Group is the lessee

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to profit or loss on a straight-line basis over the period of the lease.

Leases of assets where the lessee has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at the inception of the lease at the lower of the fair value of the leased assets and the present value of the minimum lease payments. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the liabilities balance outstanding. The corresponding rental obligations, net of finance charges, are included in other long-term payables. The interest element of the finance cost is charged to profit or loss over the lease period so as to achieve a constant periodic rate of interest on the remaining balance of the liability for each period. The asset acquired under finance leases is depreciated over the shorter period of the useful life of the asset and the lease term.

Leases where the Group is the lessor

Lease in which a significant portion of the risk and rewards of ownership are retained by the lessee are classified as finance lease. When assets are leased out under a finance lease, the present value of the lease payments is recognised as a receivable. The difference between the gross receivable and the present value of the receivable is recognised as unearned finance income. Lease income (interest income from finance lease receivable) is recognised over the term of the lease using the net investment method, which reflects a constant periodic rate of return.

Lease in which a significant portion of the risk and rewards of ownership are retained by the lessor are classified as operating lease. Assets leased out under operating leases are included in property, plant and equipment in the statement of financial position. They are depreciated over their expected useful lives on a basis consistent with other similar property, plant and equipment owned by the Group.

2.14 Service concession arrangements

The Group recognises a financial asset arising from a service concession arrangement when it has an unconditional right to receive cash or another financial asset from or at the direction of the grantor for the construction or upgrade services provided. Such financial assets are measured at fair value upon initial recognition. Subsequent to initial recognition, the financial assets are measured at amortised cost.

2.15 Borrowings

Borrowings are recognised initially at the fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between proceeds (net of transaction costs) and the redemption value is recognized in profit and loss over the period of the borrowings.

Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent that there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a pre-payment for liquidity services and amortised over the period of the facility to which it relates.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the end of reporting date.

General and specific borrowing costs directly attributable to the acquisition or construction of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised as expense in the period in which they are incurred.

2.16 Current and deferred income taxes

The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case the tax is also recognised in other comprehensive income or directly in equity, respectively.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of reporting period in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is recognised, using the liability method, on temporary differences arising from differences between the tax base of assets and liabilities and their carrying amounts in the financial statements.

However, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. Deferred income tax is provided on temporary differences arising from investments in subsidiaries, associates and joint arrangements, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

2.17 Employee benefits

The Group operates various post-employment benefits schemes which comprised defined benefit, defined contribution plans and other long-term benefits

2.17.1 Defined contribution

The Group provides provident fund, which is contributed by the employees and the Group, and managed by an external fund manager in accordance with the Provident Fund Act. B.E. 2530. The Group has no legal or constructive obligations to pay further contributions once the contributions have been paid even if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods. The contributions are recognised as employee benefit expense when they are due.

2.17.2 Retirement benefits

The Group provides for post-employment benefits, payable to employees under the labour laws applicable in Thailand and other countries in which the Group has its operations, or when the term of service is terminated according to the agreement between the Group and employees. Typically defined benefit plans define an amount of retirement benefit that an employee will receive on retirement, usually depends on many factors such as age, years of service and compensation.

The liability in respect of employee benefits is the present value of the defined benefit obligation at the end of the reporting date which is calculated by an independent actuary using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting estimated future cash flows using yields on government bonds that matches the terms and currency of the expected cash outflows.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise.

Past-service costs are recognised immediately in profit or loss.

2.17.3 Other long-term benefits

The Group gives gold rewards to employees when they have worked for the Group for 10, 15 and 20 years.

These obligations are measured similar to defined benefit plans except remeasurement gains and losses that are charged to profit or loss.

2.18 Provisions

2.18.1 General provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated.

2.18.2 Provisions for decommissioning cost

The Group recognises provision for decommissioning costs, which are provided at the onset of completion of the project, for the estimate of the eventual costs that relate to the removal of the assets. The recognised provision for decommissioning costs are based on future removal cost estimates and incorporate many assumptions such as abandonment times and future inflation rate and discounted to present value at the discount rate estimated by the management. Those costs are included as part of the assets.

2.19 Revenue recognition

Revenue are recorded net of value added tax. They are recognised in accordance with the provision of goods or services, provided that collectability of the consideration is probable.

Multiple element arrangements involving delivery or provision of multiple products or services are separated into distinct performance obligations. Total transaction price of the bundled contract is allocated to each performance obligation based on their relative standalone selling prices or estimated standalone selling prices. Each performance obligation is recognised as revenue on fulfilment of the obligation to the customer as details below.

Revenue under the Power Purchase Agreements (PPA)

(a) Revenue under the PPA which are not classified as lease

- The Group recognises Capacity Payments or Availability Payments which are the revenue for maintaining availabilities of power plants as agreed with EGAT and industrial customers in accordance with terms of PPA. The Group recognises this revenue in profit or loss when rendering services to customer according to the agreements. If the Group receives consideration above the services rendered, the Group recognises the excess consideration as a contract liability. On the other hand, if the Group receives consideration less than the services rendered, the Group recognises the consideration as a contract asset.
- Energy Payments are recognised at a point in time when the controls over the products are transferred to the customers at destinations as stated in the agreements. The revenue from Energy Payments are recognised based on transaction price net of output tax, rebates and discounts.

(b) Revenue under the Power Purchase Agreements which are classified as lease

- Finance lease income under the power purchase agreements is recognized on an effective interest method over the period of the agreements. Rental income from operating lease under the power purchase agreements is recognised on a straight-line basis over the period of the agreements.
- Service income under finance and operating lease agreements related to power purchase agreements, which comprises revenue for maintaining availabilities of power plants, other service income and Energy Payments received from financial lease receivables and operating lease receivables with respect to the leased assets, is recognised when the services are rendered. If the Group receives consideration above the services rendered, the Group recognises the excess consideration as a contract liability. On the other hand, if the Group receives consideration less than the services rendered, the Group recognises the consideration as a contract asset.
- Contingent rents are recognised in profit or loss in the period in which they are incurred. Contingent rent is that portion of lease payments that is not fixed in amount but varies based on a future factor, such as the amount of use or production.

Revenue under the steam and water purchase agreements

Revenue under the steam and water purchase agreements are recognised at a point in time when the controls over the products are transferred to customers at destinations as stated in the agreements. The revenue is recognised based on transaction price net of output tax, rebates and discounts.

Dividend income

Dividend income is recognised when the right to receive payment is established.

Interest income

Interest income are recognised by the effective interest rate method.

2.20 Dividend distribution

Dividend distribution to the Group's shareholders is recognised as a liability in the financial statements in the period in which the dividends are approved by the Company's shareholders, and interim dividend are approved by the Board of Directors.

2.21 Accounting for derivative financial instruments

The Group is party to derivative financial instruments, which mainly comprise interest rate swap contracts and cross currency swap contracts.

Interest rate swap contracts

Interest rate swap contracts protect the Group from movements in interest rates. Any differential to be paid or received on the interest rate swap contracts is recognised as a component of finance costs as incurred. Gains and losses from early cancellation of interest rate swap contracts is recognised in profit or loss.

Cross Currency Swap Contract

Cross currency swaps contracts protect the exposure from movements in exchange rates and interest rates in the future. Financial assets or financial liabilities in foreign currencies, which under swap contracts, will be translated into functional currency, at contracted rates and revalued by using exchange rates prevailing at the reporting date. The differences on exchange rates are recognised in profit or loss and the differences on the interest rate are recognised as a component of finance costs.

Details of financial instruments to which the Group is a party is disclosed in Note 35.

2.22 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Steering Committee that makes strategic decisions.

3 Change in accounting policies and reclassification

Change in accounting policies

The Group has adopted the new Thai Financial Reporting Standard (TFRS) 15, "Revenue from contracts with customers" from 1 January 2019. The adoption of TFRS 15 mainly affects the Group's accounting treatment on revenue recognition of capacity payments and availability payments in relation to the availabilities of the power plants, as agreed with the Electricity Generating Authority of Thailand (EGAT) and industrial customers in accordance with terms of the Power Purchase Agreements. The Group recognises this revenue in profit or loss when rendering services to customers according to the agreements. If the Group receives consideration above the service rendered, the Group recognises the excess consideration as a contract liability. On the other hand, if the Group receives consideration less than the service rendered, the Group recognises the consideration as a contract asset.

However, the adoption of the new revenue standard does not have significant impact on the Group's financial statements.

Reclassification

During the year ended 31 December 2019, the Group has reclassified comparative figures to conform to the current period presentation of the Group.

Impacts on the statement of financial position as at 31 December 2018.

	As previously reported	Reclassification	As reported in these financial statements
Consolidated statement of financial position			
Cash and cash equivalents	4,911,405,612	748,356,927	5,659,762,539
Deposits at financial institutions used as collateral	1,087,994,829	(748,356,927)	339,637,902
Trade receivables	4,091,919,027	216,162,478	4,308,081,505
Other receivables	579,021,123	(305,995,834)	273,025,289
Dividend receivables	-	89,833,356	89,833,356
Intangible assets, net	498,528,297	1,782,468,900	2,280,997,197
Right of use of natural gas distribution pipeline, net	536,745,733	(536,745,733)	-
Deferred right to use asset, net	1,001,421,882	(1,001,421,882)	-
Other non-current assets	924,164,092	(244,301,285)	679,862,807
Separate statement of financial position			
Trade receivables	2,713,742,384	216,162,478	2,929,904,862
Other receivables	452,006,405	(305,995,821)	146,010,584
Dividend receivables	-	89,833,343	89,833,343
Intangible assets, net	80,643,683	164,346,094	244,989,777
Other non-current assets	791,130,327	(164,346,094)	626,784,233

Impacts on the statement of income for the year ended 31 December 2018.

	As previously reported	Reclassification	As reported in these financial statements
Consolidated statement of income			
Revenue from sales and services	24,234,554,298	102,737,777	24,337,292,075
Revenue from sale of Nitrogen	102,737,777	(102,737,777)	-
Cost of sales and services	20,201,378,750	97,184,773	20,298,563,523
Cost of sale of Nitrogen	97,184,773	(97,184,773)	-
Administrative expenses	919,885,174	16,721,775	936,606,949
Selling and distribution expenses	16,721,775	(16,721,775)	-
Separate statement of income			
Revenue from sales and services	17,312,051,558	102,737,777	17,414,789,335
Revenue from sale of Nitrogen	102,737,777	(102,737,777)	-
Cost of sales and services	14,970,425,315	97,184,773	15,067,610,088
Cost of sale of Nitrogen	97,184,773	(97,184,773)	-
Administrative expenses	839,986,574	16,721,775	856,708,349
Selling and distribution expenses	16,721,775	(16,721,775)	-

4 Critical accounting estimates and judgements

Estimates, assumption and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

During the year 2019, the Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are outlined below.

4.1 Fair value estimation of intangible assets arising from an acquisition of investments in subsidiaries

The Group estimates fair value of intangible assets arising from an acquisition of investments in subsidiaries by basing on the valuation technique (the discounted cash flows) that involves many assumptions for example the electricity tariffs, assumed capacity of the power plants, growth rate, operating expenditures, etc. The assumptions used also involved significant management judgement to assess the future cash flows and discounted rate applied for the future cash flows (Note 14.1).

4.2 Impairment of goodwill

The Group annually tests for impairment of goodwill in accordance with the accounting policy stated in Note 2.11. The recoverable amounts of cash-generating units have been determined based on value-in-use calculations. These calculations use cash flow projections based on financial budgets covering the remaining period of the long-term power purchase agreements of the Group and assumed electricity tariffs, capacity of the power plants stated in the agreements. Discount rates used are based on pre-tax weighted average cost of capital (see in Note 18). If the discount rate used in the calculation increases by 1% per annum, no impairment of goodwill is recognised in the consolidated financial statements for the year ended 31 December 2019.

4.3 Impairment of property, plant and equipment

The Group tests impairment of property, plant and equipment whenever events or changes in circumstances indicate that the carrying amount of asset is greater than its estimated recoverable amount. Recoverable amount is the higher of fair value less costs to sell and its value in use. The calculation of fair value less costs to sell involves significant judgements and assumptions of the management in respect to characteristics and conditions of individual asset, expected disposal period, including the list of total assets expected to be disposed. The value-in-use calculates from a cash flow projection covering the remaining periods of Power Purchase Agreements, assumed electricity tariffs, capacity and discounted rate (Note 16).

5 Capital risk management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group has alternative practices include returning capital to shareholders, issuing new shares or selling assets to reduce debt.

6 Segment information - consolidated financial statements

The Group has three segment reports which are comprised of Independent Power Producer, Small Power Producer and others as follows:

Consolidated financial statements				
For the period year 31 December 2019				
	Independent Power Producer Baht'000	Small Power Producer Baht'000	Others Baht'000	Total Baht'000

14.1 Investments in subsidiaries

Movements of investments in subsidiaries for the year ended 31 December 2019 are as follows:

	Separate financial statements Baht'000
Opening net book value	9,378,179
Additional investments ^{(a), (b), (c)}	134,605,189
Cash receipt from payback of capital ^(d)	(58,227)
Closing net book value	143,925,141

Significant changes in investments in subsidiaries for the year ended 31 December 2019 are as follows:

(a) Glow Energy Public Company Limited and ENGIE Holding (Thailand) Company Limited

On 20 June 2018, the Company entered into a Share Purchase Agreement with ENGIE Global Developments B.V. (ENGIE) to acquire shares totalling 1,010,976,033 both directly and indirectly in Glow Energy Public Company Limited (GLOW), a company that generates and supplies electricity, steam and water. The share acquisition represents 69.11% of total registered and paid-up capital at the purchase price of Baht 91.99 per share, totalling Baht 93,001 million. The acquisition of GLOW's shares was achieved by acquiring 218,696,260 direct shares and 792,279,773 indirect shares from acquiring all the shares of ENGIE Holding (Thailand) Company Limited. Sources of funding are a financial institution and related parties. The Company made a full payment to ENGIE and changed a shareholder's name on 14 March 2019.

Detail of fair value of the net assets acquired recognised at the acquisition date is as follow:

	Consolidated financial statements Baht'000
Cash and cash equivalents	14,316,877
Deposits at financial institutions used as collateral - current assets	170,841
Trade receivables	6,133,037
Finance lease receivable	4,106,980
Other receivables	285,905
Fuel, spare parts and supplies, net	5,500,956
Deposit at financial institutions used as collateral - non-current assets	200,000
Property plant and equipment, net	75,335,586
Intangible assets, net	45,419,715
Deferred tax assets	3,359,889
Other non-current assets	85,630
Trade payables and other payables	(4,720,556)
Deferred tax liabilities	(10,706,647)
Others current liabilities	(1,457,022)
Short-term loans	(701,550)
Long-term loan from financial institutions	(19,796,686)
Debentures, net	(16,301,856)
Other non-current liabilities	(12,558,931)
Other assets less other liabilities	330,852
Fair value of identifiable net assets	89,003,020
Less Non-controlling interests	(32,091,923)
Total fair value of identifiable net assets acquired	56,911,097
Goodwill	36,089,836
Purchase consideration - cash	93,000,933

Right to power purchase agreements which presented as intangible assets are amortised using the straight-line method based on their estimated useful lives between 5 years to 31 years. Goodwill is not amortised but is tested annually for impairment.

On 22 September 2019 and 2 December 2019, the Company acquired securities of GLOW from tender offer and on 13 August 2019, the Extraordinary General Meeting of Shareholders of GLOW passed a resolution to approve the delisting of Securities, and on the same date, GLOW submitted the Application for delisting of Shares (F10-7) to the Board of the Stock Exchange of Thailand. The Board of the Stock Exchange of Thailand ordered to delist the ordinary shares of GLOW from being listed securities from 13 December 2019 onwards.

During the year 2019, the Company acquired securities by tender offer from non-controlling interests of Baht 40,806 million. As a result, the Company has total investment in GLOW of Baht 133,807 million. This increased direct and indirect shareholding interests from 69.11% to 99.83% of registered and paid-up capital.

The effect of change in the ownership interests of GLOW on the equity attributable to owners of the Company during the year ended 31 December 2019 is summarised as follows:

	Consolidated financial statements Baht'000
Carrying amount of non-controlling interests acquired	25,814,282
Consideration paid to non-controlling interests	(40,806,272)
Deficit from the change in the ownership interests in subsidiaries	(14,991,990)

Revenue and net profit of Glow Energy Public Company Limited and its subsidiaries (Glow Group) since the acquisition date included in the consolidated statement of income for the year ended 31 December 2019 were Baht 41,032 million and Baht 6,258 million, respectively.

Had Glow Group been consolidated on 1 January 2019, the consolidated statement of income for the year ended 31 December 2019 would show revenue from sales and service and revenue from lease receivable of Baht 49,719 million and Baht 464 million, respectively and net profit of Baht 7,757 million.

(b) Natee Synergy Company Limited

During the year ended 31 December 2019, Natee Synergy Company Limited called for additional paid-up share capital and the Company paid for additional paid-up share capital in the same portion as its original investment, totalling Baht 321 million.

(c) Energy Recovery Unit Company Limited (ERU)

On 7 May 2019, the Company established Energy Recovery Unit Company Limited which registered in Thailand with registered capital ordinary shares of 47.7 million shares at par value of Baht 10, totalling Baht 477 million. The Company owns 100% shareholding interests in ERU and fully paid for all called share capital. The principal business operation of the subsidiary is to generate and supply electricity.

(d) Ichinoseki Solar Power 1 GK

On 5 July 2019, the Company received cash paid back for capital reduction from Ichinoseki Solar Power 1 GK which was agreed by both shareholders on an equity true-up condition amounting to JPY 188 million, which is equivalent to Baht 53 million. As a result, the Company recognised a loss on exchange rate amounting to Baht 5 million in the separate statement of income.

Global Power Synergy Public Company Limited
Notes to Consolidated and Separate Financial Statements
For the period ended 31 December 2019

During the year ended 31 December 2019, the Group recognised impairment loss for some machines of power plant phase 2 in the consolidated statement of income in amounting to Baht 129 million due to the termination of its operation. Management determined the recoverable amount using value in use.

The gross amount of the Group's fully depreciated plant and equipment that were still in use as at 31 December 2019 was Baht 3,552 million (2018: Baht 699 million).

Security

As at 31 December 2019, the Group's property, plant and equipment with a net book value of Baht 42,843 million were mortgaged and pledged as collateral for the long-term loans, as described in Note 23 (as at 31 December 2018: Baht 12,286 million).

Borrowing costs

The Group capitalised borrowing costs of Baht 33 million (2018: Baht 21 million) which arose from financing for the construction of new power plants. The capitalisation rate were from 2.49% to 2.54% per annum (2018: capitalisation rate from 1.5% to 5.0% per annum).

<u>Less</u> Provision for impairment	-
Net book value	36,103,999

Goodwill arose from the acquisitions of the production and distribution of electricity, steam and water businesses in Thailand and foreign countries. The Group's management allocate goodwill to each of operating segments which are Independent Power Producer, Small Power Producer and Others

Goodwill of Baht 36,089 million arising from the acquisitions of Glow Energy Public Company Limited (GLOW), a company that produces and distributes electricity (both Independent Power Producer and Small Power Producer), steam and water for industrial use (Note 14.1). As at 31 December 2019, the Company is under the process of allocating goodwill from GLOW acquisition.

Goodwill arising from each operating segment of electricity generation businesses is tested annually for impairment by comparing the carrying amount to the recoverable amount which is determined based on value-in-use calculations. The value-in-use was calculated by using a cash flow projection, which is approved by the management, covering the remaining periods of Power Purchase Agreements and using the estimation of electricity tariffs and the power plant's capacity. The inflation rates and discount rates which are the weighted average costs of capital used for each operating segment were as follows:

	Consolidated financial statements	
	2019	
	Independent Power Producer %	Small Power Producer %
Inflation rate	1.1 - 2.1	1.1 - 2.1
Discount rate	5.3	5.3

Short-term benefits	314,984	74,848	86,535	73,085

35 Fair value

35.1 Fair value

Financial assets and liabilities carried at fair value, are classified into levels by valuation method. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

35.2 Financial assets and liabilities that are not measured at fair value

The carrying amounts of the following financial assets and financial liabilities approximate their fair values: cash and cash equivalents, deposits at financial institutions used as collateral, short-term investments, trade receivables and payables, amounts due from and due to related parties, other receivables and payables, and short-term loans due to the short maturities of these financial assets and financial liabilities.

(a) Long-term loans to related parties, long-term loans from financial institutions and debentures

The fair values of long-term loans to related parties, long-term loans from financial institutions and debentures with fixed interest rates have been calculated by level 2.

The contract amounts and fair values are as follows:

	Consolidated financial statements		Separate financial statements	
	2019		2019	
	Carrying amount	Fair value	Carrying amount	Fair value
	Baht'000	Baht'000	Baht'000	Baht'000
Asset				
Long-term loans to related parties	89,930	88,249	89,930	88,249
Liabilities				
Long-term loans from financial institutions	4,414,582	4,129,741	-	-

	Consolidated financial statements		Separate financial statements	
	2018		2018	
	Carrying amount	Fair value	Carrying amount	Fair value
	Baht'000	Baht'000	Baht'000	Baht'000
Asset				
Long-term loans to related parties	96,854	94,514	96,854	94,514
Liabilities				
Long-term loans from financial institutions	145,388	142,911	-	-
Debenture	4,994,970	4,967,480	4,994,970	4,967,480

Global Power Synergy Public Company Limited
Notes to Consolidated and Separate Financial Statements
For the period ended 31 December 2019

The fair values have been calculated from the net present value of future cash flows discounted by market interest rates using rates at the date of financial statements. The fair values of long-term loans from financial institutions and long-term loans to related parties with floating interest rates approximate their carrying amounts.

The fair value of debentures is determined by the last bid price on the Thai Bond Market Association on the last business day of the year.

(b) Derivatives financial instruments

The fair values of the derivatives financial instruments have been calculated by level 2.

The fair values of the derivatives financial instruments at the date of financial statements are as follows:

As at 31 December 2019					
Financial instruments	Currency	Gain (Loss) on fair value of financial instruments		Fair value hierarchy	Valuation techniques and key inputs for fair value measurement
		Consolidated financial statements	Separate financial statements		
		Million	Million		
Interest rate swap agreements				Level 2	Discounted cash flow
- Baht	Baht	(565)	-		
- Yen	Yen	(131)	-		
- US Dollar	US Dollar	(22)	-		
Forward foreign exchange contracts				Level 2	Discounted cash flow
- Euro / US Dollar	Euro	(4)	-		
Cross currency interest rate swap agreement				Level 2	Discounted cash flow
- US Dollar / Baht	Baht	(479)	-		
As at 31 December 2018					
Financial instruments	Currency	Gain (Loss) on fair value of financial instruments		Fair value hierarchy	Valuation techniques and key inputs for fair value measurement
		Consolidated financial statements	Separate financial statements		
		Million	Million		
Interest rate swap agreements				Level 2	Discounted cash flow
- Yen	Yen	(72)	-		

For the discounted cash flow method, future cash flows are estimated based on relevant market price of hedged position, i.e. interest rate, foreign exchange rate, coal price, discounted at a rate that reflects the credit risk of various counterparties.

36 Financial risk management

The Group is exposed to normal business risks from changes in market interest rates and currency exchange rates and from non-performance of contractual obligations by counterparties. The Group does not hold or issue derivative for speculative or trading purposes.

Risk management is integral to the whole business of the Group. The Group has a system of controls in place to create an acceptable balance between the cost of risks occurring and the cost of managing the risks. The management continually monitors the Group's risk management process to ensure that an appropriate balance between risk and control is achieved.

Capital management

The Board of Directors' policy is to maintain a strong capital base so as to maintain confidence of investor, creditor and market confidence and to sustain future development of the business. The Board monitors the return on capital, which the Group defines as result from operating activities divided by total shareholders' equity, excluding non-controlling interests and also monitors the level of dividends payment to ordinary shareholders.

Interest rate risk

Interest rate risk is the risk that future movements in market interest rates will affect the results of the Group's operations and its cash flows. The Group is primarily exposed to interest rate risk from loan to related parties and loan from financial institutions as at 31 December 2019 and 2018 as disclosed in Note 23 and Note 34, respectively.

Foreign currency risk

The Group is exposed to foreign currency risk relating to financial assets and liabilities which are denominated in foreign currencies. The Group primarily utilises foreign currency forward contracts to hedge some short-term foreign currency risk when appropriate.

At 31 December, the Group exposed to foreign currency risk in respect of financial assets and liabilities denominated in the following currencies:

	Consolidated financial statements			
	2019		2018	
	Foreign currency Million	Baht Million	Foreign currency Million	Baht Million

		292		112

Credit risk

The Group has no significant concentrations of credit risk relating to its cash and investments. The Group places its cash and investments with high quality financial institutions. The Group's policy is designed to limit exposure with any one institution and to invest its excess cash in low risk investment accounts. The Group has not experienced any losses on such accounts. For trade receivables, the Group's sales are made to state-owned enterprises and industrial users under the terms and conditions of the long-term Power Purchase Agreements and the long-term Electricity and Steam Sales and Purchase Agreements.

Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of credit facilities and the ability to close out market positions. Due to the dynamic nature of the underlying business, Group Treasury aims at maintaining flexibility in funding by keeping credit lines available.

Risk of Commodity Price

Commodity swap agreements

Commodity swap agreements manage exposure to fluctuations in coal price. A subsidiary entered into such agreement to hedge the coal price from Global Coal Newcastle Index to certain price stipulated in the agreements as follows:

Contract date	Coal (metric tonnes)	Effective date	Settlement date
23 August 2019	21,000	1 October 2019 - 31 December 2019	14 January 2020
4 September 2019	11,202	1 October 2019 - 31 December 2019	14 January 2020
16 September 2019	11,202	1 October 2019 - 31 December 2019	14 January 2020
31 October 2019	21,000	1 November 2019 - 31 January 2020	14 February 2020
11 November 2019	22,401	1 November 2019 - 31 January 2020	14 February 2020
11 November 2019	21,702	1 December 2019 - 29 February 2020	16 March 2020
4 December 2019	21,000	1 December 2019 - 29 February 2020	16 March 2020

As at 31 December 2019, the above commodity swap agreements made with the financial institutions are guaranteed by the Subsidiary.
